Dear Customers and Partners:

As the coronavirus outbreak in China continues to develop, we wanted to provide an update on Amphenol's actions in response to this serious health emergency. While Amphenol operates a number of factories throughout China, we do not have any facilities in Hubei province or Wuhan city. Regardless, our top priority remains the health and safety of our employees as well as the employees of our customers, partners and vendors, and we are taking all necessary measures to ensure that all such individuals are not put at risk of contracting the coronavirus. At the same time, we understand that security of supply of our products to you is of critical importance. Accordingly, we as a corporation are taking the following steps, consistent with our Business Continuity Plans:

- Instituting real-time communications between our global executive team and our China facilities to ensure real-time responsiveness to the dynamic situation
- Establishing Epidemic Control Committees at each China facility, led by the local General Manager or Plant Manager
- Planning for the earliest possible re-opening of facilities that have been closed, including making appropriate applications to local governments
- Tracking all employees to confirm whether any of our employees have been in Hubei province or outside the area in which the factory is located
- Instituting health screening and quarantine procedures for all employees before beginning work
- Adopting enhanced hygiene measures in all facilities, including securing sufficient levels of hygiene supplies such as temperature checking equipment, face masks and sanitizer
- Limiting employee travel and reducing visitors to our facilities to only those deemed essential, and instituting health screening of all visitors
- Ensuring our vendors have put in place appropriate measures to safely re-initiate production and secure material supply
- Ensuring that our freight providers can support our logistical requirements
- Supporting production requirements from other Amphenol locations outside of China, as appropriate

While we may not be able to completely prevent the coronavirus outbreak from impacting our ability to supply products to you, please rest assured that our entire organization around the world is highly focused on minimizing any impact to your needs as a customer. We truly appreciate your understanding as well as the expressions of concern and support that we have received from so many of you. Please do not hesitate to contact your local Amphenol team if there is any information you require, or if there is anything we can do to further support you. Our sales teams will be providing you with regular updates on the situation. We are confident that by working together, we will manage through this challenging time and thereby guarantee our mutual success for many years to come.

Thank you for your continued confidence in and partnership with Amphenol.

R. Adam Norwitt  
President and Chief Executive Officer
