

From: Amphenol PCD Shenzhen Co., Ltd

To: To whom it may concern

Subject: REACH Regulation

Please find hereafter the Amphenol PCD Shenzhen Co., Ltd (APCD) updated status regarding the REACH regulation:

1. Registration process:

APCD does not manufacture or buy chemicals in excess of 1 ton a year, and our articles are not intended to release any substance. So we are not concerned by the registration procedure. We are working with our suppliers to be sure that they (or their suppliers) have pre-registered/registered their concerned substances. Today, we have not received any negative answer.

2. Authorization process:

We constantly make sure that:

- All the safety data sheets we need are updated and available in our manufacturing plant of Shenzhen.
- The different uses of chemicals we have are covered with the planned exposure scenarios.

3. Restriction process:

REACH Substances of Very High Concern (SVHC) per Europe Union (EU) Regulation 1907/2006.

The latest **173** substances restricted per the REACH Regulation were **last updated on Jan 12, 2017**.

Please refer to the following for the most current candidate list of substances:

<http://echa.europa.eu/candidate-list-table>.

APCD confirms that the intentional composition of the articles we put on the market do not contain one of these substances above a maximum concentration as defined in the REACH Regulation as the 0.1% by weight in the articles.

We are in continuous communication with the supply chain to determine if any of the SVHC is present in the materials supplied to APCD as the SVHC lists are published by the EU.

APCD does not independently conduct analytical testing for REACH. The information in this letter is based upon technical data or declaration from our supply chain which is believed to be reliable and accurate. The information provided is subject to change as additional experience and knowledge is gained. APCD will notify its concerned customers upon the discovery of any article containing a SVHC above a maximum concentration as defined in REACH.

Please feel free to contact me for further information.

Best regards,

*Normandy*
