

2M CABLE OVERMOLDING CAPABILITY

Choose Amphenol PCD Cable Solutions, supporting an overmolded 2M Series as a replacement drop in with our competitors connectors.

2M CABLE OVERMOLDING CAPABILITY

Overview

Amphenol Pcd offers high performance injection-molded cable assemblies, supporting Amphenol's 2M Connector Series. With superior cable overmolding capabilities, the 2M Series is available as a drop in replacement to competitors connectors. The unique combination of interconnect expertise and harness manufacturing capabilities enables us to offer the optimum solution at the design phase by leveraging our connectors and wire management and harness solutions, with the goal of reducing weight, installation and maintenance times, as well as optimizing cost.

Meets/Exceeds Requirements

Amphenol's 2M Series meets requirements listed in Mighty Mouse test reports and catalogs.

Intermateable

Shell strength maximized while ensuring intermateability. Intermate and intermount with our competitors's miniature series of connectors.

Ease of Installation

Easy to install and remove contacts without damaging tools or the connector components.

High Strength to Weight Ratio

Insert to shell pushout forces in excess of 100 pounds.
